

# Common Fractions - Decimal Fractions - Percentages Equivalence

This is a domino game.

Each tile has a number represented in one of three forms:

Common fraction ( $\frac{1}{2}$  or  $\frac{4}{8}$ ), Decimal Fraction (0.5) or

Percentage (50%).

Match each tile in turn to one with the same value.

There are 20 tiles and they follow on one from the other. The last domino placed links back to the first one (unless you have made a mistake).
